

DOME 4.0 marketplace ecosystem: Pre-login

To use the services provided by the Digital Open Marketplace Ecosystem (DOME) 4.0 project, users need to access the digital platform. The DOME 4.0 platform is a cloud-based trusted and secure environment through which the users can search for data, register their data, register services, connect to other platforms, etc.

The DOME 4.0 platform is accessible either via the project web page at <https://dome40.eu/> (use the MARKETPLACE) tab on top right of the menu (see Figure 1) or directly via the <https://nextgen.dome40.io/> link.

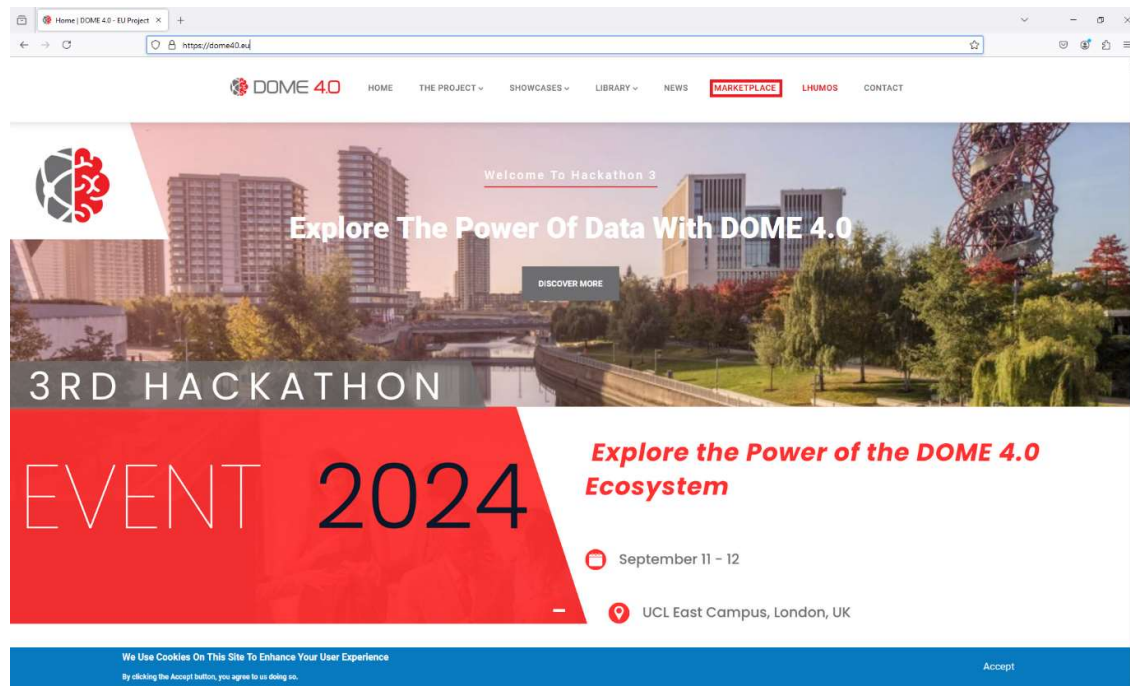

Figure 1: DOME 4.0 marketplace accessible via the DOME 4.0 web page.

Both these links will direct the user to the landing page (Figure 2). This page showcases some of the key features of the DOME 4.0 platform, including the search field, ontology visualisation, the DOME 4.0 platform metrics comprising the data providers and data consumers, and also spotlights from the nine Business-to-business showcases of the DOME 4.0. However, to access these services, the users need to log into the platform. The link to the login page could be found on the top right hand side of the web page (also shown in Figure 2). The top menu also includes items such as Showcases, About, and Contact. Clicking on the Showcases and About will also redirect the user to the login page, while clicking on the contact will provide users with access to the contact form (Figure 3).
