

DOME 4.0 marketplace ecosystem: Register tab

Keywords/actions: register, upload, make available (on DOME 4.0), provide

For whom: User/provider who wants to make available (register/upload) a new asset on DOME 4.0 or *via* DOME 4.0

In brief: The register tab lists buttons to register (“Catalog Data”, “DOME 4.0 Connector”, “DOME 4.0 Tool/Service”, “API Specification”) or upload (“Ontology”).

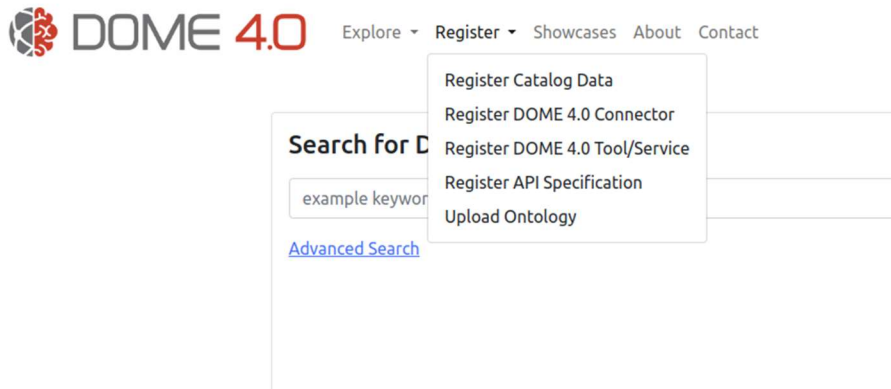

Figure: Snapshot of DOME 4.0 main page, after login, hovering on the “Register” tab

More details:

The difference between register and upload is that in the first case a connection is provided by DOME 4.0 (e.g., link, API, etc.) but the data is still stored elsewhere (e.g., on another platform, such as MARKET 4.0), whereas in the second case the data is actually stored on DOME 4.0.
